Proposal Type (Select One):

New Proposal       Ongoing Program/Project

APD Priorities Supported (Select All That Apply):

- Supports aquifer protection via development of best available science, providing technical assistance and monitoring, and/or supporting regulatory compliance. This includes inspection and/or prevention of potential pollutants penetrating the aquifer, identifying long-term risks and/or recommending actions to evaluate and mitigate these risks.
- Provides aquifer protection education, outreach and/or engagement for community members, teachers, students, stakeholder groups, or others
- Coordinates work and leverages resources with government agencies, higher education, business and industry, non-government organizations, and other stakeholders. This includes identifying and addressing gaps in regulation that leave the aquifer vulnerable to contamination.

## Program or Project Description
